- Intern at KodNest, where I acquired practical skills in Python, MySQL, Frontend, Backend, Data Structures and algorithms contributing to real-world projects and learning directly from industry professionals.

PROJECT EXPERIENCE

- **Fake Drug Detection using Image Recognition and OCR Technology**
  - Developed an automated system to identify counterfeit drugs by analyzing pharmaceutical packaging images. Implemented image recognition and Optical Character Recognition (OCR) to extract and verify printed information. Analyzed logos, patterns, batch numbers, and expiry dates to support drug authentication. Combined computer vision, image processing, and OCR techniques to improve automated verification..
- **Web Based Oral Cancer Detection using Machine Learning and Deep Learning**
  - Developed a web-based AI system for early detection and classification of oral lesions using medical images. Implemented and evaluated Convolutional Neural Networks (CNN), MobileNet, and DenseNet for image classification. Applied image preprocessing and deep learning techniques to identify patterns associated with oral lesions. Integrated the trained models into a web-based application to provide automated prediction results.
